

**State of Louisiana**  
DIVISION OF ADMINISTRATION

**OFFICE OF STATEWIDE REPORTING AND ACCOUNTING POLICY**

**M. J. AMIKE® FOSTER, JR.**  
GOVERNOR

**MARK C. DRENNEN**  
COMMISSIONER OF ADMINISTRATION

June 5, 2000

**MEMORANDUM SA 00-36**

**TO:** Purchasing Agents  
Contract Officers  
Fiscal Officers  
All ISIS Agencies

**FROM:** F. Howard Karlton, CPA  
Director

**SUBJECT:** Fiscal Year Rollover of Encumbrances

**URGENT – PLEASE ENSURE  
ALL EFFECTED AGENCY  
PERSONNEL RECEIVE A  
COPY OF THIS MEMO.**

Beginning with the nightly processes of August 10, 2000 and continuing through September 30, 2000, AGPS, CFMS, and AFS will perform the fiscal year rollover process for FY00 regular appropriation encumbrances. The system will be taken off-line at 5:00 p.m. on 8/10/00. If the rollover is successful, ISIS will be brought up at its regular time on 8/11/00. **Prior to 5:00 p.m. on 8/10/00 agencies have the opportunity to determine the encumbrances that should be rolled to FY01, and affect the necessary changes to successfully roll those encumbrances over into FY01 or exclude unwanted encumbrances from the rollover process.** Agencies have the ability to change the FY Roll flag in AGPS/CFMS at any status code, from 'Y' to 'N' and vice versa, to prevent or cause the rollover of encumbrance balances into FY01.

Enclosed are the procedures relating to the rollover of encumbrances and a listing of the reports that will be generated to aid you with this process. The AGPS/CFMS reports will be in BUNDL and are not distributed by agency. You may use the 'Find' feature of BUNDL to locate the sections of these reports that apply to your agency. (See ISIS BUNDL Quick Reference Card).

**All FY00 invoices liquidating encumbrances must be processed by 5:00 p.m. on 8/10/00.**

Agencies should complete or cancel all open AGPS change orders, invoices and receipts on all FY00 encumbrances on or before 5:00 p.m. 8/10/00, as appropriate. You should review SUSF for pending AFS PO Mods, the AGPS BO20A - Aged Invoice, BO21A - Aged Payment, BO25A - Aged Receipt by Order Number reports and/or InfoMaker reports. OSIS has a new InfoMaker report on their website. Agencies can run this report daily to check their open encumbrances. The report is called **AFS6 - Outstanding PO's For Fiscal Year** and can be downloaded from the OSIS web site at <http://www.state.la.us/osis/adhoc/afs.htm>. The User will be prompted to enter the agency number and fiscal year when previewing the report. This report can be used to determine which encumbrances should be rolled into the next fiscal year.

Last year OSRAP was contacted by personnel from several agencies that were unaware of processing deadlines. This caused payments issued after rollover to post to the wrong fiscal year. Due to changes from last year's deadlines, it is imperative that all personnel receive and review these instructions. If you have any questions pertaining to these instructions, please contact the OSRAP Help Desk at (225) 342-1097 for assistance.

FHK: rtj

## REPORTS

### Available During Fiscal Year

**2G44 Agency Encumbrance by Appropriation/Organization.** This is an AFS monthly report that lists all encumbrances with an open balance in the financial system (AFS) regardless of the system from which the transactions originated. Agencies should access this report to determine if AFS encumbrances will be needed in the new fiscal year. Agencies may review this report for all open encumbrances; however, AGPS/CFMS will generate the BK29A Rollover Candidate Report for the encumbrances that were initiated in AGPS/CFMS.

**Available June 6 to August 10** - The following pre-rollover reports will be available through BUNDL on a weekly basis beginning June 6, 2000. Agencies should retrieve the most current version of these reports from BUNDL.

**BK29A Rollover Candidate Report.** This report lists AGPS/CFMS encumbrances that will be rolled over into FY01, if agencies do not liquidate the encumbered amounts or change the AGPS/CFMS Roll flag to 'N'. Agencies should access this report to determine if action should be taken to liquidate FY00 encumbrances before the August 10, 2000 rollover.

**BK28A Reconciliation Report.** This report lists all AGPS/CFMS encumbrances that may or may not meet all of the rollover criteria. Encumbrances listed may not meet the rollover criterion requiring balances in AGPS/CFMS equal the balance in AFS. Open encumbrance balances in AGPS/CFMS that equal the AFS balance will reflect an 'R' in the status column of this report. Encumbrances with differing open balances in AGPS/CFMS and AFS will reflect an 'O' in the status column of this report and **will not** be rolled over into FY01. Encumbrances with an open balance in AGPS/CFMS and no balance in AFS will reflect an 'N' in the status column of this report and **will not** be rolled over into FY01. This report will show order encumbrances that were rolled over from FY99 to FY00. These order encumbrances **will not** rollover again into FY01. You may access the ORD4 screen to determine if the encumbrance was previously rolled over. The BFY will reflect 99 and the FY will reflect 00 on the ORD4 screen. This report will also show orders/contracts tied to vendors that are not active (the vendor's s/c is at 2, 6 or 7 – AGPS only), these orders/contracts **will not** be rolled over. Agencies should access this report to determine if an encumbrance that is needed in FY01 will be rolled over. If an encumbrance listed on this report does not meet the rollover criterion for the reasons stated above and the encumbrance will be needed in FY01, the agency will have to issue a new order for FY01 in AGPS or create/adjust the KOFY and encumbrance amounts manually in CFMS.

**BK33A Rollover Discrepancy Report.** This report lists all AGPS/CFMS encumbrances that will not be rolled over into FY01 because the open balances in AGPS/CFMS do not equal the open balance in AFS. If an encumbrance listed on this report will be needed in FY01, the agency will have to issue a new order in FY01 in AGPS or create/adjust the KOFY and encumbrance amounts manually in CFMS.

**Available August 11** - The following reports will be generated only once during the first run of the rollover process the night of August 10, 2000 and will be available in BUNDL on August 11.

**BK28C AGPS New Year Error Report and BK47A CFMS New Year Error Report.** These reports will list the encumbrances, by accounting distribution line number, for those accounting lines that have not been sent to AFS for FY01 due to chart of account coding problems. Agencies should access this report to determine if accounting distribution coding corrections need to be entered and processed on OAMR of AGPS or KACG/KCAC of CFMS. After 9/30/00 AGPS orders, which have not been corrected, will be closed.

**BK28Y AGPS Document Rollover Report and BK47Y CFMS Document Rollover Report.** These reports list AGPS/CFMS documents (encumbrances) that rolled successfully into FY01. The encumbrances listed on these reports and the New Year Error reports, should be all of the encumbrances originally listed on the Rollover Candidate report.

**BK47B Base Contract Amount Exception Report.** This report will list CFMS contracts that have FY01 encumbrance balances which were not rolled over because the amount to be rolled over plus the FY01 encumbered amount exceeds the base contract amount. The FY01 amount will be liquidated by the rollover process and the agency will have to encumber manually any FY01 balance up to the base contract amount.

**4G15 AFS P/Y Encumbrances Status Report.** This annual report lists the AFS created encumbrances tied to regular appropriations that were rolled over to FY01. Agencies should access this report to obtain the FY01 PO number assigned to their AFS rolled encumbrances. Rolled encumbrances, which reject due to chart of accounts changes, may be found on the Suspense File (SUSF). The agency will scan in the DOCUMENT section on TYPE 'PO', AGCY 'your three digit agency number', NUMBER 'NPO' and STAT 'REJECT'.

**Available August 12 - October 1** - The following post-rollover reports will be generated during this period and can be accessed through BUNDL daily. The final night of the AGPS roll over run is 9/30 after which all FY00 orders that have not rolled over successfully into FY01 will be closed. Agencies should always retrieve the latest version of these reports. After the initial run of the rollover process on 8/10 AGPS will continue to run the rollover process for orders with outstanding OAMR records each night until 9/30.

**BK28D AGPS New Year Error Report for Failed AGPS Encumbrances.** This report will list the accounting distribution lines that still require the agency's correction before they can be sent to AFS. These lines were established on OAMR during the nightly processes on 8/10/00. If the items listed on this report are not corrected on OAMR on or before 9/30, they will be closed and the agency will have to reenter the order if it is still needed.

**BK28Z AGPS Document Rollover Report for OAMR's Processed.** As the order accounting distribution records are corrected by the agencies on the OAMR screen and rolled over successfully, the orders will appear on this report.

The following procedures should be followed to ensure that the orders agencies wish to have rolled over from FY00 to FY01 are processed. The procedures are divided by the subsystem of ISIS from which the transaction originated.

**REMEMBER:** AGPS and AFS encumbrances are rolled over one year only. If an encumbrance was previously rolled over from FY99 to FY00, it will not roll again. CFMS encumbrances will continue to roll for as long as they meet the contract document rollover criteria.

AGPS created encumbrances rolled over into FY01 will have a document number in AFS prefixed with "01" and suffixed by "00". CFMS created encumbrances rolled over into the new year will be prefixed with "01". The document number of the transactions will not change in AGPS or CFMS. The new year AFS PO's will begin with NPO and the remaining eight digits will be assigned by automatic document numbering.

Agencies CANNOT process new FY00 encumbrances or increase their FY00 AGPS/CFMS encumbrances during the 45-day close. Although AFS will allow the processing of FY00 new encumbrances and increases to existing FY00 encumbrances during this time, it is illegal and against the Division of Administration policy to do so.

In most cases, the FY01 rollover accounting distribution will be created with the same account coding as the FY00 encumbrance. The only exceptions are CFMS contracts for which the agency has already encumbered FY01 funds. The accounting distributions for those contracts will use the coding on the existing FY01 accounting lines if you created the same number of accounting distribution lines in FY01 that existed in FY00. If not, you will have to roll the remaining balance manually. It is important to verify that no structure changes have occurred in AFS that will cause the liquidation of the FY00 or establishment of the FY01 encumbrance to fail.

Agencies should also ensure that no grant end dates in the Federal Aid System, that have encumbrance documents tied to those grants, end before 8/10/00. This will cause the liquidation to reject. Agencies should process an AFS FM document to extend any grant end dates as necessary, by 5:00 p.m. on 8/10/00.

**AGPS encumbrances tied to a vendor code whose status is not 1, 3, or 4, will be closed and the encumbrance will not be rolled over into the new fiscal year. CFMS encumbrances tied to a vendor code whose status is not 1, 3, 4, or 7 will be closed and the encumbrance will not be rolled over into the new fiscal year.**

### **AGPS INSTRUCTIONS**

<u>Date</u>	<u>Action</u>
6/6/00 - 8/10/00	<ol style="list-style-type: none"><li>1. Agencies will retrieve and review the BK29A Rollover Candidate Report from BUNDL.</li><li>2. If the rollover of an encumbrance is not desired, the agency will do one of the following:<ol style="list-style-type: none"><li>A. If the agency expects to process at least one payment against the order on or before 8/10/00, the agency should flag that payment as a final payment.</li><li>B. If there are no payments pending, the agency will change the 'FY Roll' flag from a 'Y' to an 'N' on the OFST or ORD4 screen, as appropriate.</li></ol></li><li>3. If an order is not listed that is needed and the FY Roll flag is 'N' and the order meets all other roll over criteria and has not previously rolled, simply change the rollover flag to 'Y'.</li><li>4. Reviews the BK33A Rollover Discrepancy Report to determine if the encumbrance balances that the agency wants rolled over to FY01 are listed.</li></ol>
7/1/00 - 8/10/00	<ol style="list-style-type: none"><li>5. If the agency receives a FY01 invoice on a purchase order that will be rolled over and the invoice MUST be paid before 8/11/00, the agencies will use the following procedures.<ol style="list-style-type: none"><li>A. If the invoice is \$10,000 or less, the agency issues payment using an LDO and adjust the purchase order balance using OCHG types DEC (the amount is less than the balance rolled and there are other items to be received and paid for) or CNX (the invoice completes the order and no</li></ol></li></ol>

other invoices have been processed) or OPLQ (the invoice completes the order and prior payments were issued from AGPS against the order) up to 8/10/00.

- B. If the invoice is greater than \$10,000, then the agency will issue the payment through AFS and adjust or cancel the FY01 encumbrance balance using OCHG (DEC or CNX) or OPLQ.

**NOTE: If the invoice may be paid on or after 8/11/00, the agency should hold the invoice until then.**

8/11/00 - 9/30/00

6. Agencies will retrieve and review the BK28C (8/11/00) and BK28D (8/12 -9/30/00) AGPS New Year Error Reports. Agencies are to locate and correct, on OAMR, the accounting distribution coding for the orders listed on these reports. The orders listed on these reports have invalid accounting distribution information for FY01. For example:

Inactive or missing structure components  
(reporting category or organization)  
Inactive appropriation unit  
Changed inferred data (Appropriation unit,  
reporting category, fund)  
Expired Federal Aid grants

The agency will access the OAMR screen to correct the error condition of each affected accounting distribution line listed on the report for the encumbrances needed in FY01. The rollover program will continue to run each night in order to process corrections made on OAMR.

If the agency does not make corrections to an order, the system will close the order after 9/30/00 with a status code of 493 - Order Closed in AFS.

7. Agencies will retrieve and review the BK28Y (8/11/00) and BK28Z (8/12- 9/30/00) AGPS Document Rollover Reports for FY 00 encumbrances that rolled over to FY01.

Agencies should follow established order processing procedures for all future transactions against the order.

8. If the agency receives a FY00 invoice **8/11/00 – 8/14/00**, the agency will issue payment through AGPS using an LDO (amount less than 10,000) or AFS (amount greater than 10,000) and adjust the amount rolled to FY01. (See steps 5A and 5B).

### **CFMS INSTRUCTIONS**

<u>Date</u>	<u>Action</u>
6/6/00 - 8/10/00	<ol style="list-style-type: none"><li>1. Agencies will retrieve and review the BK29A Rollover Candidates Report from BUNDL.</li><li>2. If the rollover of the contract balance is not desired, the agency should change the Roll flag on KENT to an 'N'.</li><li>3. If a contract is not listed because the roll flag on KENT is 'N', the agency desires that the contract roll into FY01 and the contract meets all other rollover criteria, simply change the Roll flag to 'Y'.</li><li>4. Retrieves and reviews the BK33A Rollover Discrepancy Report to determine if needed encumbrances are listed on this report.  Encumbrances listed on this report will not be rolled over to FY01 and their FY00 balance will be zero liquidated on 8/10/00. The agency will manually have to process the encumbrance for FY01.</li></ol>
8/11/00	<ol style="list-style-type: none"><li>5. Agencies will retrieve and review the BK47A CFMS New Year Error Report. Items are listed on this report due to invalid accounting distribution information and were not rolled. These conditions include:  Inactive or missing structure components (reporting category or organization) Inactive appropriation unit Changed inferred data (Appropriation unit, reporting category, fund) Expired Federal Aid grant  The agencies must correct the error condition, if these transactions will be needed.</li></ol>

6. Agencies will retrieve and review the BK47Y CFMS Document Rollover Report.

A. The KOFY fiscal year records for the contracts listed have been updated and the FY00 balance has been liquidated. The status code of KENT will not change and agencies may continue with normal processing.

- 1) If a FY01 encumbrance existed on 8/10/00, the system will create a KAMD type 'ROL' and the needed KCAC line(s) for FY01.

**NOTE: You must have created the same number of accounting lines in FY01 that existed in FY00 or you will have to manual roll over any remaining balance to the new year.**

- 2) If a FY01 encumbrance does not exist on 8/10/00, the system will create the necessary FY 00 and FY01 KACG records to close the balance in the prior year and reestablish it in the current fiscal year.

7. Agencies will retrieve and review the BK47B Base Contract Amount Exception Report for encumbrances which have not been rolled over because the balance to be rolled from FY00 plus the FY01 balance would have exceeded the base contract amount on KENT.

- A. If the agency has an amendment in progress that has been encumbered but not approved, the agency needs to have the amendment approved.
- B. If the agency has made an error in calculating the amount encumbered for FY01 and a part of the FY00 balance still needs to be rolled, the agency will have to roll the balance manually using accounting change process.

8/11/00 - 8/14/00

8. If an invoice for FY00 is received after 8/10, pay through AFS and adjust the amount rolled to FY01, if necessary.

9. The contract was never encumbered and the agency receives an invoice, the agency will process a payment

voucher in AFS referencing the CFMS contract number and adjust the contract on the KOFC screen.

**NOTE: If a situation arises differing from the above, contact the OSRAP Help Desk at (225)342-1097.**

### **AFS INSTRUCTIONS**

AFS will roll all encumbrances tied to regular appropriations that were not rolled over in a previous fiscal year.

<u>Date</u>	<u>Action</u>
7/2/00 - 8/10/00	<ol style="list-style-type: none"><li>1. Agencies will retrieve and review the 2G44 Agency Encumbrance By Appropriation/Organization report from BUNDL for AFS encumbrances that will not be needed in FY00.<ol style="list-style-type: none"><li>A. If an agency does not want the AFS encumbrance to roll over and will have an invoice to process on or before 8/10/00, the agency will mark that payment as a final payment and the PO will be closed.</li><li>B. If the agency will not have a payment to process by 8/10/00, the agency will process a PO Mod modifying the encumbrance to zero.</li></ol></li><li>2. Agencies will retrieve and review the 4G15 AFS P/Y Encumbrances Status Report at 8/11/00 from BUNDL.<p>If the encumbrance documents have processed successfully, agencies may continue with normal processing.</p></li></ol>
8/11/00 - 8/14/00	<ol style="list-style-type: none"><li>3. If the agency receives a FY00 invoice after 8/10/00, the agency will process a payment voucher transaction referencing the original purchase order number in the description field.<p>If a balance was rolled successfully to FY01, the agency will process a mod for the amount of the invoice received up to the encumbrance amount.</p></li></ol>

**Agencies will be contacted by OSIS to delete rejected rollover documents from SUSF that cannot be processed. Do not attempt to remove rejected documents without discussing the transactions with OSIS personnel before 9/30/00. The OSIS Help Desk Number is (225) 342-2677.**
